Why AMAN?

Success Story

Aman offers differentiator services that set us apart from other cybersecurity consultancy services in the area of risk assessment and defensive security. Our goal is to become an industry leader in the cybersecurity consultancy space by following our impeccably-crafted vision and becoming the go-to service for strategic risk management and cyber protection.

Price and Quality Equilibrium

At Aman, it is our philosophy to offer best quality cyber security consultancy services to all public, private, and government agencies, irrespective of their scale and scope. We deliver the most costcompetitive services in the cybersecurity industry which does not sacrifice quality and are one of the very few companies that SMEs can access for premium services.

Easy Communication and Convenient Time Zone

Aman is known for its prompt and effective customer services. No matter where you are in the world, you can easily connect with our cutting-edge services. Since we cater to global clients, we offer a 24/7 customer care center so that it is convenient to access our cybersecurity services, anytime, anywhere.

Aman – Building Resilience, One Step at a Time

At Aman, we understand that security leaders are struggling to not just reduce risk but to make sure their security updates and upgrades are sustainable and are instrumental in preparing the organization for future threats. We follow a step-by-step approach to cybersecurity transformation, drawing on our comprehensive knowledge or organizational processes and understanding of the psychology of potential attackers

OUR VISION

To be a leader in the cybersecurity consulting field and empower our clients with cutting-edge, sustainable, resilient, and actionable cybersecurity strategic solutions to ensure safe, protected, and happy clients

OUR MISION

To provide top-of-the-line cybersecurity and risk management consultancy to our clients that will empower them to proactively defend against such threats, eliminate digital security risks, and build a stronger security posture for the betterment of the community.

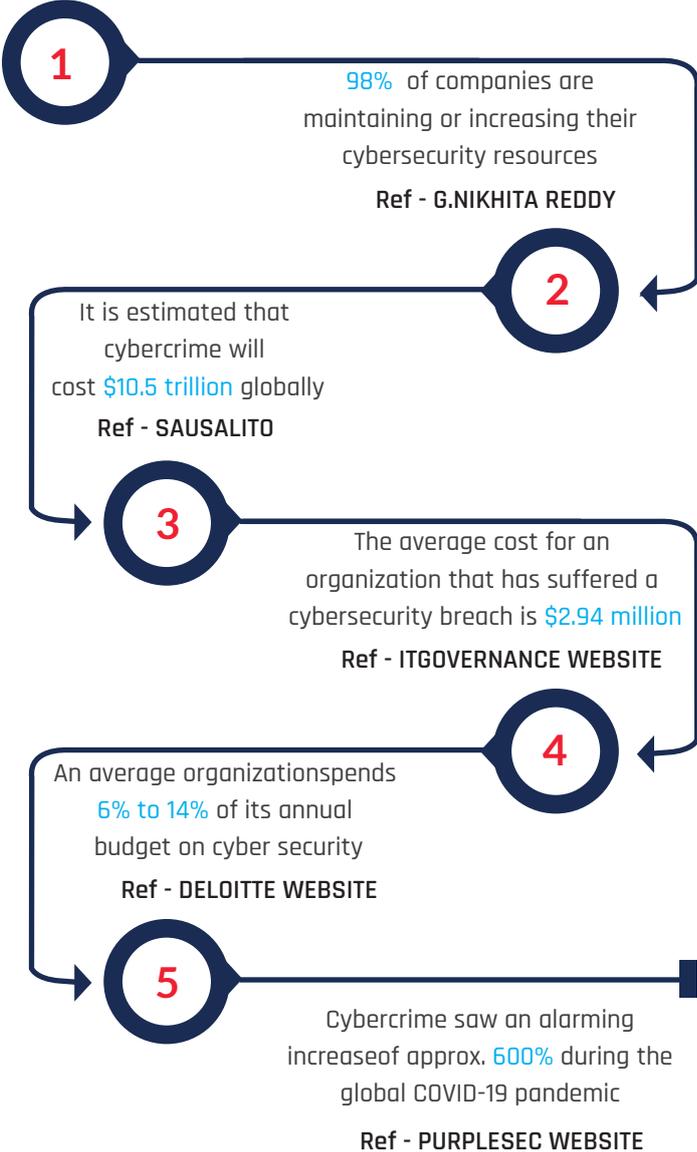

Cyber crime is imminent and requires strategies to reduce risks

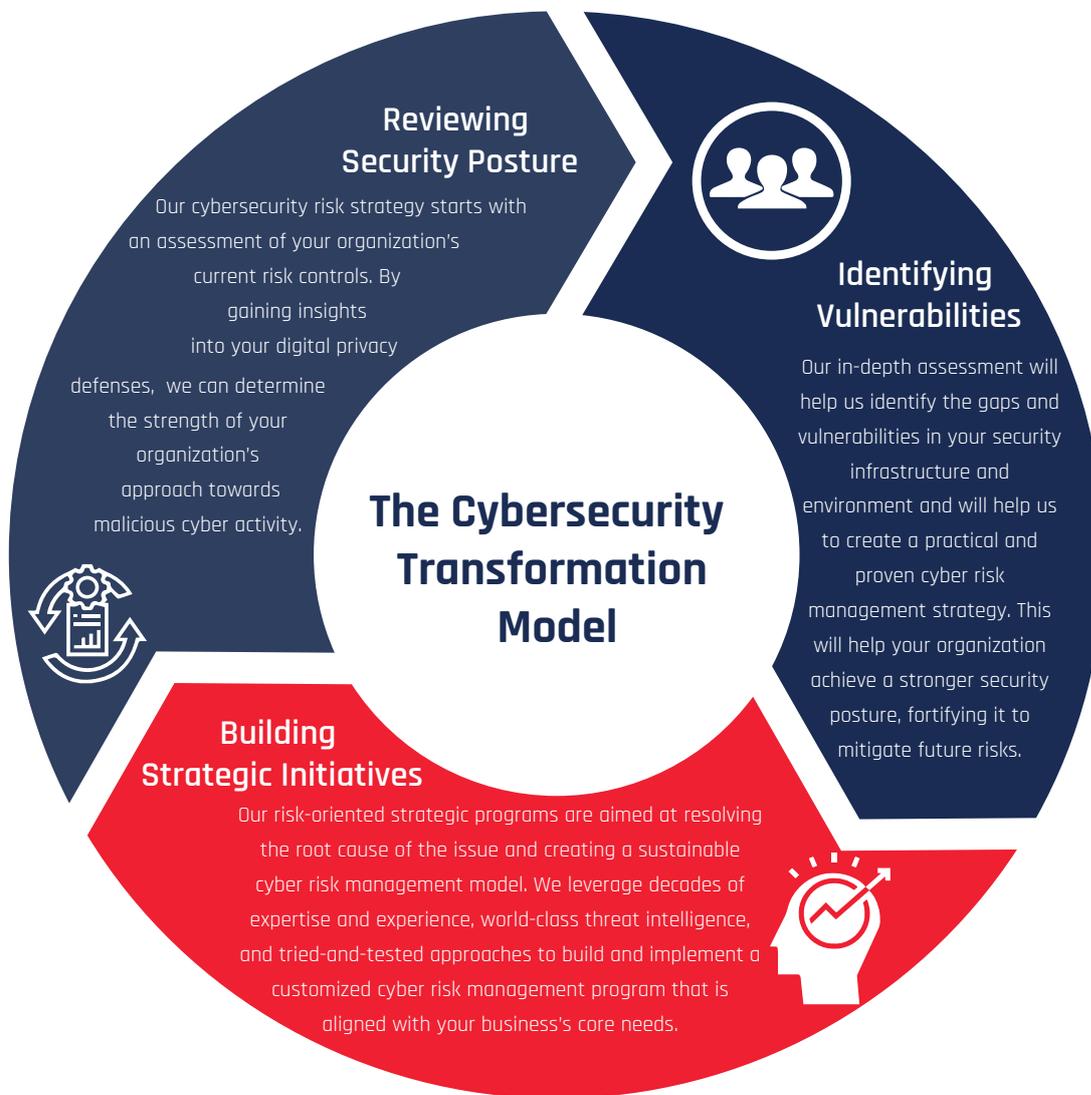

Data privacy and security remain the top-most security measures in any organization. Securing information and keeping it away from unauthorized access and malicious users has become one of the biggest challenges of the 21st century. Since the advent of the novel coronavirus, the risks to organizational data have increased exponentially. The hybrid work model, compounded with a lack of awareness in employees about the importance of cybersecurity, means organizations are now more vulnerable than ever before to not just external threats, but internal ones as well.

The irony is that it wasn't that long ago when executives would have long meetings on business strategy without even mentioning security and privacy. Today, however, most companies have significant assets manifested in digital form and they are deeply integrated with the global networks. Meanwhile, cyber-attacks continue to become more sophisticated and have adjusted to defenses.

Today, most private, public, and governmental organizations acknowledge the fact that cyber-attacks pose a serious and imminent threat to their business. The majority of the companies are now preparing for when, not if, a cyber-attack happens.

What they are still uncertain about is how to improve their security posture and create a viable strategy that can help them identify, address, and mitigate threats - in all forms - not just for today but for the future as well.

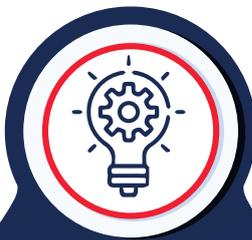

Our Guiding Values & Principles

At Aman, everything we do is dictated by our core values, which are followed by everyone in the company from C-suite executives to our newest employees.

Team work

We are a strong advocate of equity and creating a culture of community in our company. Our staff comes from multidisciplinary fields and from diverse cultures, which has allowed us to create diverse teams that are enriched by multiple different perspectives.

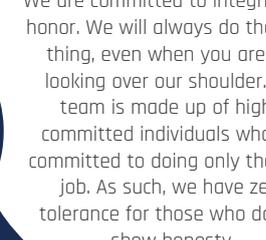

Transparency

Our work is as transparent as possible. We are committed to the good of our clients and are 100% dedicated to offering solutions that offer the maximum benefit to our valued clients. That is why, we are not afraid of accountability and keep it in mind in everything we do.

Integrity

We are committed to integrity and honor. We will always do the right thing, even when you are not looking over our shoulder. Our team is made up of highly committed individuals who are committed to doing only the best job. As such, we have zero tolerance for those who do not show honesty.

Innovativeness

We value creativity, innovativeness, and inventiveness. Our team is trained to have an inquisitive mindset, which helps them come up with out-of-the-box solutions for your project, rather than cling to obsolete practices. We have a philosophy of continuous improvement that result in turn-key solutions and better client relationships.

Customer First

We are a client-focused company and prioritize customer satisfaction. It is our policy to understand a client's needs, ensuring they are met with commitment, positivity, optimism, and expertise.

Our Approach

At Aman, all our projects are based on our all-encompassing approach:

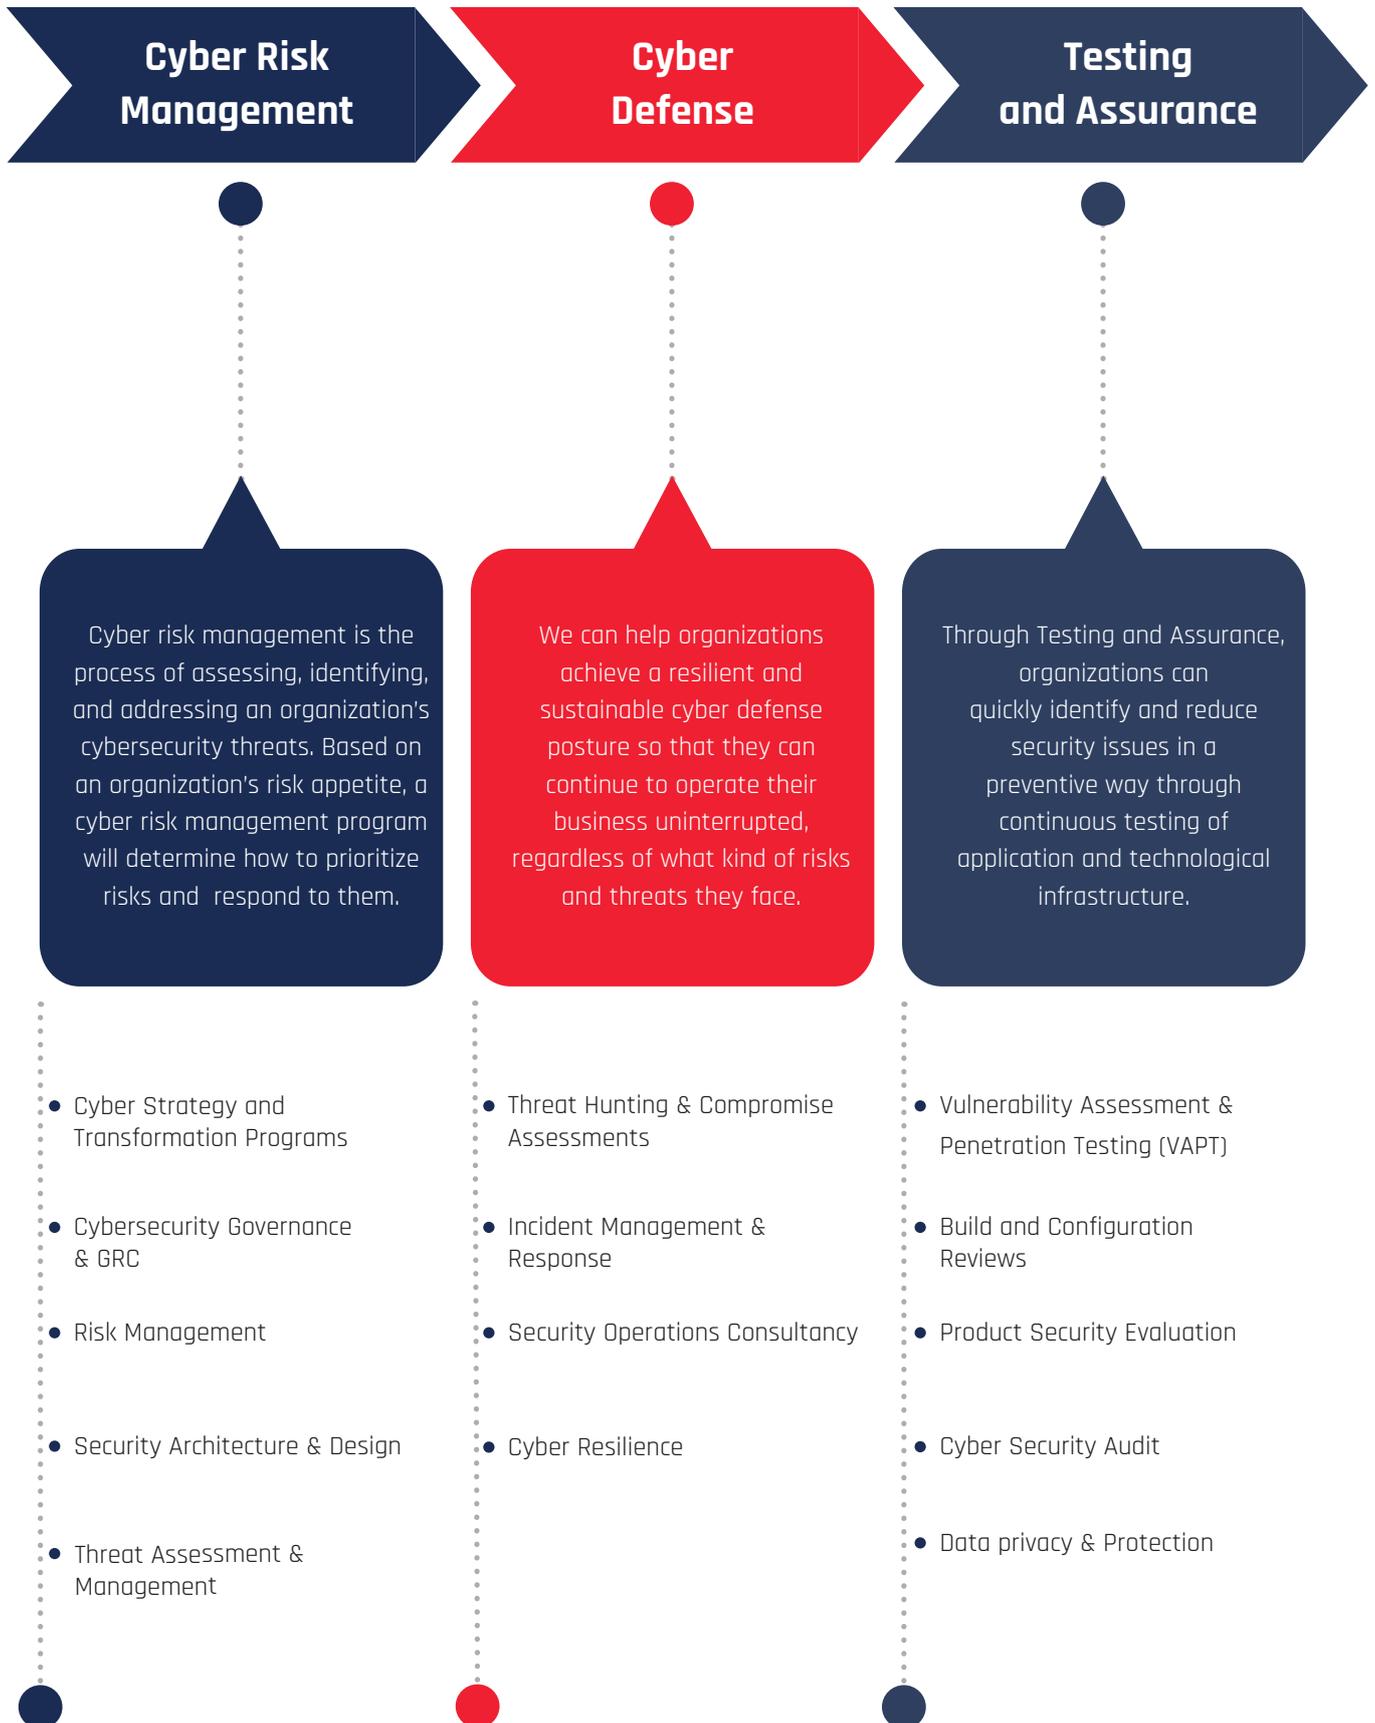

“ The more difficult the development and testing environment, the less likely "off-theshelf" solutions will help. Our engineers collaborate with you to understand your problems and assist you in developing atailored solution for your target environment. ”

Our People

What We do

Benefits Delivered & Value Realized

Place Your Trust in Industry-Leading
Cybersecurity Solutions by Aman

Why Choose Us

Cybersecurity Experts

Our cybersecurity specialists have studied from global universities and have licenses and certifications, as well as years of experience in handling a wide range of cybersecurity issues.

Flexible Solutions

All our services are highly customized tailored to meet your organization's goals. We get an in-depth understanding of where you want your organization to go before creating a unique cybersecurity solution for it.

Versatile Cybersecurity Service

We offer multi-level, step-by-step solutions that have been designed based on comprehensive assessment and testing to ensure no vulnerabilities remain undetected.

Comprehensive Experience

Our team has years of experience waging war against cybersecurity criminals and has witnessed all the most malicious attacks and threats in the industry, so they are uniquely positioned to help your organization.

World-Class Implementation

We offer modern and sophisticated cybersecurity solutions that leverage state-of-the-art technology and combine it with tried-and-tested solutions to improve organizational security posture.

About the Company

In today's environment, cyber attacks and threats are constantly evolving and putting organizations to new and hard-to-combat risks and dangers. At Aman, we understand that it is high time to ramp up your cybersecurity to protect your organization's intelligence, privacy, and productivity. Aman is committed to helping public, private, and governmental organizations succeed by bringing them turn-key comprehensive and sustainable cybersecurity solutions so that they can enjoy optimal security throughout the organization.

Our range of flexible cybersecurity services includes risk management, cyber defense, and testing and assurance that can help you secure your organizational framework. Our talented team of engineers, cybersecurity specialists, and assessment professionals execute a multilayer protocol analysis to identify any risks to your organization. Our multi-level defense system equips our partners with the most cutting-edge tools to prepare your organization for managing cyber risks. We offer detailed reports on any vulnerability that your organization might have as well as innovative solutions to fix them.

Messages from **AMAN**

"We help cover the risk that comes from insider threats, uncover targets of assets and people, identify data exposure risks, and identify emerging and innovative solutions to combat cyber-attacks."

President of Aman solutions for cyber security

"Don't let your data fall into the wrong hands!" Every worthwhile innovation contains flaws, whether they are visible or not, known or unseen. We feel that because they were created as an accessible system, new and emerging technologies have intrinsic flaws. Our objective is to support businesses/organizations by bringing creativity and delivering solutions that benefit them while also protecting their systems and IT assets."

Aman, Head of Cybersecurity

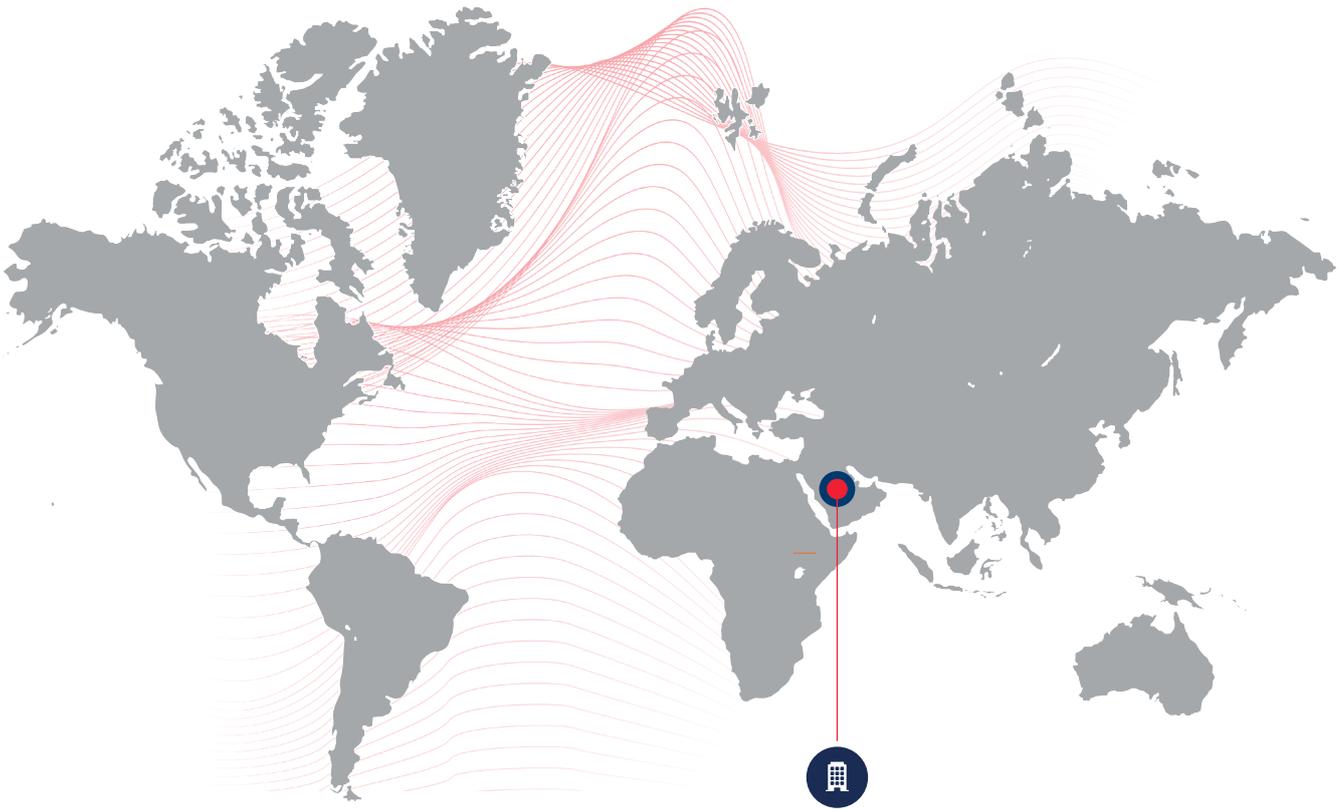

"Many organizations ignore taking a cybersecurity consultation or an annual risk assessment evaluation until they are exposed to a cyberattack, either harming their reputation or damaging their assets. In this case, they know the value of cybersecurity and the cost might be huge."

Majed, Co-founder
